

## Technical Assistance to the National Statistics Office (INSTAT) and its regional offices

### Context

The context of this project is related to the fact that INSTAT is entering into an important and delicate phase of its institutional duties, with direct consequences on the credibility and EU compliance of the Albanian National Statistical system. The planned organization of the population and housing census in 2011, the agriculture census and the economic non-agriculture enterprises census, are going to be very important activities, having direct impact not only on INSTAT itself, but on the developing national statistical system and on the country as a whole. For the country as a whole, implementing a census allows the country to provide to its government and to international organizations a correct picture of itself, including a wealth of quality data for evidence based decision-making and for international comparison.

### The main activities:

- Reinforcement of the regional network of INSTAT offices: Assisting INSTAT with the reinforcement of Regional Offices to support the decentralization of some target statistical activities, by improving capacities and skills in the INSTAT regional offices and putting in place a ICT system monitored centrally from INSTAT HQ and in line with European standards and best practices in use in other European countries.
- Improved capacity of INSTAT to carry out forthcoming censuses (agriculture and

population): This aims at supporting INSTAT to set up adequate management structure at INSTAT, planning activities, and to develop specific competencies and skills for the preparation of the agriculture census and population and housing census in Albania

- De-concentration of a core of statistical data collection and survey responsibilities

### Benefits

- Allowing the country to provide to its government and to international organizations a correct picture of itself, including a wealth of quality data for evidence based decision-making and for international comparison.
- Increasing the sustainable capacities, in terms of data collection and processing, and – especially – analysis
- Enabling INSTAT to produce sustainable and reliable regional data on the basis of NUTS regulations and international standards.

### MAIN FACTS

#### PARTNERS:

- ✓ European Commission

#### DURATION:

September 2009 – September 2010

#### BENEFICIARIES:

- ✓ INSTAT
- ✓ Regional offices

### About URI

Since 1999 the Urban Research Institute (URI) has been delivering big results for development projects and programmers carried out throughout Albania. Our core business focuses on community development, local government strengthening, environmental protection, decentralization, and public services. We conduct studies, lobby the government, train local government units, increase public access to information, and connect development partners. URI has worked with donors such as USAID, Swiss Cooperation, the Netherlands Embassy, UNDP, World Bank, EU, SIDA, Open Society/Soros Foundation, etc.
