## **DIFFERENTIAL WASTE COLLECTION IN TWO CURRENTS AND WASTE RECYCLING**

***Urban Research Institute (URI), in cooperation with the Municipality of Lezha and with financial support from the Embassy of the Kingdom of the Netherlands in Albania has implemented the project "Participatory Plastic Cleaning and Waste Management in Municipality of Lezha" as an attempt to help implement the National Strategy on Waste Management and assist in improving the management of solid waste to reduce plastic waste and other recyclable.***

The main goal of this project is to increase awareness and education on environmental protection, strengthening organizational and institutional capacity to implement plastic waste management and waste through a participatory process.

This booklet was prepared by URI in collaboration with experts in the field and its purpose is preparing to introduce the citizens in general and schoolchildren in particular, the project "Participatory Plastic Cleaning and Waste Management in Municipality of Lezha" by presenting a new method of separation of waste in two currents: inorganic (recycled) and organic (not recyclable) and challenge the citizens of Lezha to actively participate in keeping their city clean.
