"SUPERVISION AND TEST OF CONSTRUCTION WORK" MANUAL

The Manual sets some standards for supervising and the monitoring, as well as the testing of construction works and also taking in charge the infrastructure projects (public works) according to the legislation and the best practice.

It also includes some standard forms for the registration of works, expenditures and reporting forms for the local unit, so that the technical staff of these units can work with more efficacy and efficiency.

This Manual was financed by the MSI/USAID under the project “Reducing Corruption in Albania”.
