Training Delivery and Module Preparation for Local Government units on the Service of Public Procurements

The strategy for the Decentralization of Local Government is under full implementation in Albania. Its implementation requires other legislation to be produced, strengthen of central and local institutions and increase the capacities and service delivery effectiveness at the level of local government units. UNDP Local Governance Program funded corresponds with the momentum in which the implementation of the decentralization strategy requires the attention and support of all stakeholder involved in the process. The increase of responsibilities at the local level, the increase of the public investments level and new authorities given with the law On Organization and Functioning of the Local Government, brings the need for increasing local capacities for a better management of financial and human resources.

A manual to which local official can refer to address their needs in this area were the first step towards the support they need to increase their capacities.

Topics that this document covers:

- i. Transparent and fair procurement techniques and plans they should prepare at the beginning of the year for procuring and contracting out services, goods and works: and
- ii. Contracting and technical specifications.
